NEW STYLE MEAT-INSPECTION STAMPS AND CERTIFICATES.

All stations doing an export business will in a short time be supplied with new style regular (white) meat-inspection stamps and certificates. The stamps are put up in boxes, each box containing five bundles of 500 stamps each; the certificates are on loose sheets put up in boxes, each box containing 100 or 250 certificates. When both are received their simultaneous use should be begun at once, except that the old style white stamps and certificates shall be used until September 30, 1907, unless the supply on hand is exhausted prior to that date. On October 1, or as soon thereafter as convenient, if the new supply is then available, each inspector in charge will destroy by burning the unused old style regular (white) meat-inspection stamps and certificates then on hand, reporting promptly to the Washington office the number and description of all such stamps and certificates destroyed and stating specifically the date and manner of their destruction.

APPROVED DIPS.

The following-named substances, in addition to those previously announced, have been approved by the Department for use in official dipping:

For Dipping Sheep and Cattle for Scabies.

"*Derby Nicotine Solution*," a tobacco extract, intended for use in preparing a tobacco-and-sulphur dip; manufactured by The Atlantic Refining Company, Cleveland, Ohio. Dilutions permitted: To make a solution containing 0.07 per cent of nicotine, 1.4 pints of Derby Nicotine Solution to not more than 100 gallons of water. To make a solution containing 0.05 per cent of nicotine, 1 pint of Derby Nicotine Solution to not more than 100 gallons of water. (Dilutions here permitted should take the place of the dilutions for Derby Nicotine Solution as prescribed in Service Announcements of June 15, 1907, page 10. This change is made at the request of the manufacturers, who prefer to put

up the product in such form that 1 pint will make 100 gallons of dipping solution containing 0.05 per cent of nicotine.)

"*To-Bak-Ine*," a tobacco extract, intended for use in preparing a tobacco-and-sulphur dip; manufactured by Detroit Nicotine Company, Detroit, Mich. Dilutions permitted: To make a solution containing 0.07 per cent of nicotine, 1.4 pints of To-Bak-Ine to not more than 100 gallons of water. To make a solution containing 0.05 per cent of nicotine, 1 pint of To-Bak-Ine to not more than 100 gallons of water.

For Dipping Sheep.

"*Creolone*," a coal-tar creosote dip, manufactured by Creolone Stock Food Company, Sioux City, Iowa. Dilution permitted, 1 gallon of Creolone to not more than 61 gallons of water.

"*Creoltin*," a coal-tar creosote dip, manufactured by Mrs. M. M. Dubin, Philadelphia, Pa. Dilution permitted, 1 gallon of Creoltin to not more than 74 gallons of water.

"*Cresoleum*," a coal-tar creosote dip, manufactured by W. B. McCloud & Co., Chicago, Ill. Dilution permitted, 1 gallon of Cresoleum to not more than 50 gallons of water.

"*Dayton's Disinfectant Daytholeum*," a coal-tar creosote dip, manufactured by W. H. Dayton, Cleveland, Ohio. Dilution permitted, 1 gallon of Dayton's Disinfectant Daytholeum to not more than 49 gallons of water.

"*Haas-oleum*," a coal-tar creosote dip, manufactured by Dr. Joseph Haas Remedy Company, Indianapolis, Ind. Dilution permitted, 1 gallon of Haas-oleum to not more than 46 gallons of water.

"*H. P. Cresol Dip*," a cresol dip, manufactured by H. P. Eysenbach, Chicago, Ill. Dilution permitted, 1 gallon of H. P. Cresol Dip to not more than 165 gallons of water.

"*Iowa Dip*," a coal-tar creosote dip, manufactured by Iowa Stock Food Company, Jefferson, Iowa. Dilution permitted, 1 gallon of Iowa Dip to not more than 50 gallons of water.

"*Karbo Dip No. 1*," a coal-tar creosote dip, manufactured by J. W. Barwell, Waukegan, Ill. Dilution permitted, 1 gallon of Karbo Dip No. 1 to not more than 26 gallons of water.

"*K. K. Animal Dip*," a coal-tar creosote dip, manufactured by the Home Medicine Company, La Harpe, Ill. Dilution permitted, 1 gallon of K. K. Animal Dip to not more than 45 gallons of water.

"*Lilly's Best Sheep Dip*," a coal-tar creosote dip, manufactured by the Charles H. Lilly Company, Seattle, Wash. Dilution permitted, 1 gallon of Lilly's Best Sheep Dip to not more than 40 gallons of water.

"*Linsol*," a cresol dip, manufactured by Mrs. M. M. Dubin, Philadelphia, Pa. Dilution permitted, 1 gallon of Linsol to not more than 81 gallons of water.

"*Minor's Fluid*," a coal-tar creosote dip, manufactured by W. E. Minor & Co., Cleveland, Ohio. Dilution permitted, 1 gallon of Minor's Fluid to not more than 50 gallons of water.

"*Moore Bros.' Dip*," a coal-tar creosote dip, manufactured by Moore Brothers, Albany, N. Y. Dilution permitted, 1 gallon of Moore Bros.' Dip to not more than 44 gallons of water.

"*Our Friend's Dip*," a coal-tar creosote dip, manufactured by the Holmes Manufacturing Company, Dunlap, Ill. Dilution permitted, 1 gallon of Our Friend's Dip to not more than 45 gallons of water.

"*Quincy Dip*," a coal-tar creosote dip, manufactured by the Quincy Stock Food Company, Quincy, Ill. Dilution permitted, 1 gallon of Quincy Dip to not more than 46 gallons of water.

"*Standard Stock Dip*," a coal-tar creosote dip, manufactured by The Chemical Manufacturing Company, Minneapolis, Minn. Dilution permitted, 1 gallon of Standard Stock Dip to not more than 50 gallons of water. (This dip must not be confounded with the Standard Stock Dip manufactured by the Standard Stock Food Company, of Omaha, Nebr., listed in Service Announcements of June 15, 1907, page 10.)

"*Tarco Brand Sheep Dip*," a coal-tar creosote dip, manufactured by the Knox & Morse Company, Boston, Mass. Dilution permitted, 1 gallon of Tarco Brand Sheep Dip to not more than 56 gallons of water.

Inspectors will not permit the use in official dipping of packages of these dips which are not labeled in accordance with the above specifications, nor will they permit the use in official dipping of any proprietary dip which does not bear the guaranty required of manufacturers by the regulations, B. A. I. Order 143 and amendments thereto, or which in any manner violates the provisions of said regulations or amendments.

INSPECTION AND MALLEIN TESTING OF HORSES FOR CANADA.

The following additions have been made to the list of practicing veterinarians registered by the Bureau and authorized to inspect and test with mallein horses for exportation to Canada under the conditions stated in Service Announcements of June 15, 1907, page 11:

Dr. E. L. Glaisyer, 1125 First avenue, Spokane, Wash.

Dr. E. J. Cramer, Pullman, Wash.

BREEDING REPORTS.

Following the suggestion in May Service Announcements that inspectors obtain reports of breeding operations on the range, blanks are being prepared for this purpose. Some reports have been received, and the results indicate that more comprehensive returns would give exceedingly valuable information. The reports will be designed to show the number of animals of each sex born, the mortality of young stock, etc. Reports for 1907 only are necessary, but when the information is obtainable reports for 1906 should be taken, care being used to show this on the blanks. Separate blanks will be used for horses, cattle, and sheep. They will be forwarded to inspectors according to the class of stock covered by their work. Inspectors should take pains to insure as much accuracy as possible. Reports should be mailed direct to the Animal Husbandman of the Bureau.

INSTRUCTIONS CONCERNING CORRESPONDENCE AND FILES.

Referring to the book of "Instructions concerning Official Correspondence and Files," the attention of inspectors in charge is called to the fact that correspondence emanating from the Washington office has a letter preceding the subject number. For example, a letter may be numbered A-14, B-14, Y-14, etc. No attention need be paid to these letters in filing, as they refer to the particular division having the matter in charge. The only correspondence from the Washington office to be filed under a letter is that referring to "J," which should be filed under "Personnel," as explained in circular letter ZC-255. In replying to correspondence, inspectors should be careful, however, to begin their letters as requested in paragraph 5 of the instructions.

In the list of numbers No. 14 has been assigned to "Requests for inspection." This number should also be used for correspondence regarding sanitation, plans, manner of conducting inspection at any particular establishment, and any question of irregularity in inspection at such establishment. All correspondence relating to each establishment should be filed together under No. 14, the firm names being arranged alphabetically.

Circular letters are not given subject numbers, but are distinguished by the letter "Z" and are to be filed in numerical order. Correspondence relating to the subject-matter in a circular letter should be given the proper file number assigned to that subject, and not the number of the circular.

Letters relating to supplies, accounts, annual leave, and publications are not given file numbers, but should be filed in front of guide cards bearing those titles.

Additional Subjects for Letter Files.

The following new numbers and subjects have been assigned, and should be entered on the blank pages of the book of instructions:

PHOTOGRAPHS AND NEWSPAPER CLIPPINGS DESIRED.

Employees are invited to send to the Washington office from time to time any photographs which they may consider of interest to the Bureau or suitable for use in its publications, also newspaper clippings relating to the Bureau's work or to subjects that may be of interest to the Bureau. Photographs should be labeled for identification or accompanied by descriptions. Inspectors in charge have been supplied with I. D. Form 58 for use in forwarding clippings.

PUBLICATIONS IN AUGUST.

[Publications intended for employees are sent in bulk to inspectors in charge at the different stations, and no mailing list of individual employees is kept. Owing to the limited editions and the large number of Bureau employees, as a rule only sufficient copies are sent to supply the veterinarians. Inspectors in charge will therefore see that the veterinary inspectors are first supplied, and if more copies are received than are necessary for this purpose the excess may be distributed to others. Requests from employees for publications of value or assistance to them in the discharge of their official duties will be complied with as far as practicable.]
